-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 30, 59, 61, 63, 64 and 65 are rejected under 35 U.S.C. 102(e) as being anticipated by Neef et al 5639250.

Neef et al discloses (Figure 6) a female edge connector having end pieces 70, 72 and center piece 12, each piece having contacts therein and mounting extensions 36 and polarization features (unnumbered parallel bars on top); and male edge connector (Figures 7 and 8) with the same features. The pieces are joined together by rear modules 14, 15, 74.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 53 and 55 are rejected under 35 U.S.C. 103(a) as being unpatentable over Neef et al.

It would have been obvious to use an adhesive to hold the pieces together since adhesives are used in a wide variety of applications where permanent securement is desired.

Claims 1, 52, 54, 56, 57, 58, 60 and 62 are rejected under 35 U.S.C. 103(a) as being unpatentable over Neef et al in view of Tyree et al 4530561.

Neef et al substantially discloses the claimed invention except for laterally extending hold-down tabs. Tyree et al discloses laterally extending hold-down tabs 2, and to provide Neef et al with laterally extending hold-down tabs thus would have been obvious, to better secure the connector to a substrate. It would have been obvious to use an adhesive to hold the pieces of Neef et al together since adhesives are used in a wide variety of applications where permanent securement is desired.

Applicant's arguments filed July 25, 2005 have been fully considered but they are not persuasive. Tyree et al discloses the obviousness of using hold-down tabs. Neef et al discloses mounting extensions 36 which are deemed to be staggered.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2833

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
